

Assignment-2

Interview Summary:

In a 30-minute mock interview, the client requested a simple app where people can create, find and join local events. They stressed easy use, good visibility of events and quick sign-ups.

Key Requirements:

- Functional:
 - User sign-up/login (email or social media)
 - Create and edit events (title, time, place, description)
 - Browse and search events by location and type.
 - RSVP to events
 - Event reminders via notifications
 - Admin control to approve events.
- Non-Functional:
 - Easy-to-use mobile design
 - Fast and reliable performance.
 - Data privacy protection.

How to Document and Trace Requirements:

- List all requirements clearly in Requirements Document.
- Link each requirement to design, development and testing tasks using a simple Traceability Table.
- Use a tool like Trello or Excel to track progress and changes.

Next steps:

- Finalize list of features for the first version of the app (MVP)
- ~~set up workshops~~ with potential end users for feedback on early wireframes.
